

Fire protection measures of Stölzle-Oberglas GmbH

Workplace regulations

- Unauthorised persons may not enter the company premises
- Alcohol is strictly forbidden throughout the entire company premises
- Smoking is forbidden throughout the entire company premises (except in the designated smoking areas)
- Clothing regulations are in place in the different departments

Fire protection measures

Craftwork - Working is only permitted when all the fire protection safety measures and fire protection safety precautions that are necessary for this are in place (fire extinguishers, fire fighting equipment, masking operations, company fire brigade).

In all cases when working with heat generating tools (welding, soldering, flame de-seaming, grinding and other high temperature work activities) the respective attending department leader or deputy and the fire protection officer must be informed and the forms designated for this completed, signed and the code of conduct described within these adhered to.

After the work has been completed the workplace must be inspected and cleaned before handing it over to the attending department leader or deputy and the fire protection officer.
