

## **1 PURPOSE**

The purpose of the Environmental Policy is to define the STÖLZLE principles of environmental protection.

## **2 SCOPE**

This is a STÖLZLE wide policy.

## **3 POLICY STATEMENT**

The Environmental Policy of the STÖLZLE GLASS GROUP is defined in compliance with the company principles and the ISO 14001 norm as well as with the legal requirements.

These are the STÖLZLE principles:

- we consider the environment in the manufacture and development of our products;
- we use the best available techniques besides the commercial aspects;
- we take environmental issues seriously and to demonstrate our commitment we continually monitor our process and the emissions from our process to identify, minimize and eradicate wasted use of energy;
- we minimize and segregate waste wherever possible to facilitate recycling of our waste material;
- we use recyclable materials where practicable;
- we integrate our suppliers and service providers in our environmental programs;
- we inform actively our employees about our environmental principles and we want to make them aware of all aspects constantly;
- we will ensure compliance with legislation both on European and national level; we will also participate in shaping future environmental legislation through communication with national and European law makers.

## **4 RESPONSIBILITY**

The Corporate Management has appointed an Environmental Manager to ensure the compliance of process to the legislation and to our principles as well as the regular monitoring and reporting.
