# INFINITY JARS

## CHARACTERISTICS OF OUR INFINITY JARS

**1**

### LARGE OPENING WITH TWIST OFF FINISH REGULAR AND DEEP TWIST OFF

The infinity jars are available in different kinds of neck finishes – regular and deep twist off.

**2**

### RING DIRECTLY BELOW THE NECK FINISH

This ring increases safety by preventing the closures from rubbing against each other, thus reducing the vacuum.

**3**

### STRAIGHT OR SLIGHTLY CONICAL DESIGN

This allows food to be dropped out or spooned out easily. Straight faces facilitate the application of labels. Nevertheless, these jars can also be decorated by different techniques.

# FIELDS OF APPLICATION

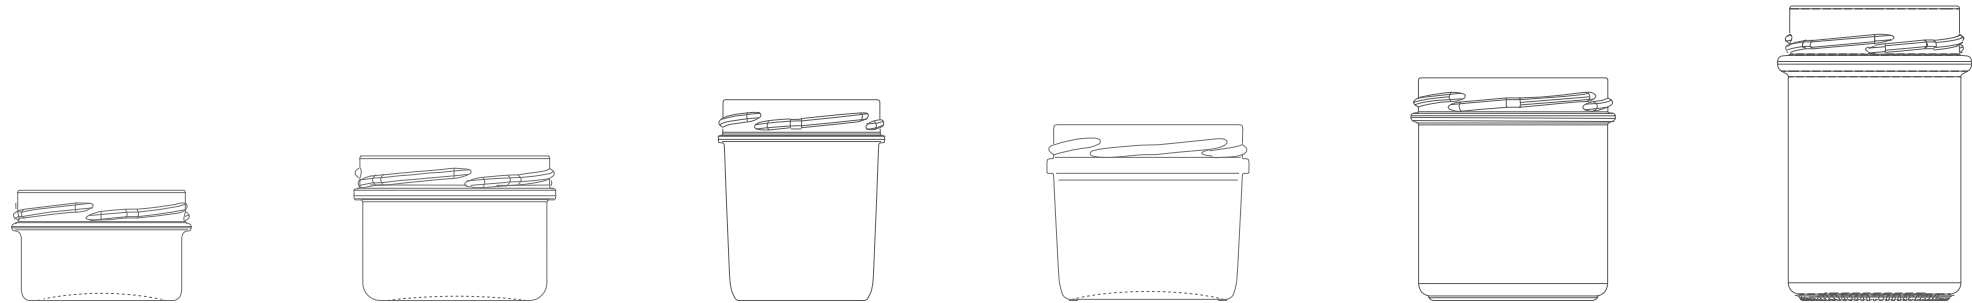

## NO LIMITS IN THE USE

The opening of the infinity jars is the widest part of the jar, which is why puddings or desserts can be easily tumbled out or spooned out. The applications for this jar are almost endless – which is why we call it the infinity jar. The jars are great for foods like:

- ✓ Jams, honey & other spreads
- ✓ Fruit and vegetable preserves
- ✓ Fish & meat preserves
- ✓ Yogurt, pudding & desserts
- ✓ Sauces

# INFINITE RECYCLING

## THE KEY FOR A CIRCULAR ECONOMY

Glass is a permanent material – the key for a well-functioning Circular Economy. Once a glass container has been produced, it remains within the closed production cycle by replacing the raw materials. Glass keeps its inherent properties regardless of how often it is recycled.

- ✓ Reduction of virgin raw materials
- ✓ 100% recyclable
- ✓ Endlessly recyclable
