

STÖLZLE GLASS GROUP

LANTERNS

COLLECTION 2019

YOUR PRESTIGE GLASS PARTNER

The Stölzle Glass Group is made up of six European production sites, which follow their strategic focus to manufacture high-end glass packaging for the Perfumery & Cosmetics, Prestige Spirits as well as the Pharma & Consumer markets. International sales offices in the USA and Russia enable the Stölzle Glass Group to provide first class customer service.

Stölzle's company vision is based on a culture of mutual trust, been highly reactive to the customer's needs with utmost flexibility and reliability. We strive to be the preferred long-term partner of both clients and our employees.

LANTERNS & CANDLE JARS

Stölzle Wymiarki, one of Stölzle Glass Group's production sites, is an expert in the manufacturing of high quality candle jars and food containers. Stölzle offers a huge variety of classic standard lanterns. Also, the European packaging manufacturer specializes in the development and production of unique custom designs. A dedicated team of designers strive constantly to focus on market trends in order to develop new fancy shapes and implement new technologies of production and decoration. To be current and keep up to date with the aim to increase efficiency and reduce time to the market, several 3D Printer kits are available and are used. Prototypes of new designs and shapes can consequently be realized easily at a low cost in a matter of hours. Packaging glass can be manufactured in commercial flint as well as in a high variety of feeder colours. Further value can be added to all products by sophisticated in-house decoration.

STÖLZLE DECORATION

In recent years decoration has become increasingly important. To make the glass bottles and containers stand out from the mass of products available on the market, more and more customers are turning to sophisticated decoration techniques and commissioning exclusive ranges at the top end of the market.

Stölzle intends to keep pace with this trend: For some time now Stölzle has been investing in new decoration techniques and facilities in Poland, France and Great Britain. These measures and initiatives enable us to offer our customers a wealth of opportunities to implement their wishes and to substantially increase the added value of our products.

- ✓ **3 in-house decoration facilities help to save supply chain costs**
- ✓ **Familiar processes: frosting, screen printing, hot stamping and spraying**
- ✓ **innovative decoration: metallisation, laser cutting, accessory application and special spraying techniques to achieve stunning results**
- ✓ **flexibility in fulfilling customers' demands**
- ✓ **Feeder colour glass capability**

STÖLZLE GLASS GROUP

QUALITY STANDARDS

The Austrian headquarters of the Glass Group was the first European manufacturer to meet GMP (Good Manufacturing Practice) guidelines. Further progress was made when reaching the BRC/IoP standards for food packaging and obtaining the official certification in autumn 2009. Each of our plants in the Glass Group has ISO 9001. In addition and depending on the strategic orientation of the production site, they manufacture either in accordance to GMP (ISO 15378) or the standard guidelines for food packaging.

SUSTAINABILITY MANAGEMENT

As a manufacturer of sustainable packaging material, Stölzle Glass Group is aware of being responsible for keeping its ecological and social impact as low as possible. Stölzle evaluates and optimizes its consumption of energy, spares natural resources and treats its stakeholders in an ethically correct manner, in all aspects of glass production. So, amongst others, Stölzle always considers energy relevant criteria when setting up new production processes or expanding its facilities. The Stölzle Group is keen on looking outside the box. This is the reason why a sustainable supply chain is that important to Stölzle. The Glass Group strives to purchase energy efficient, resource saving products, all of them produced under correct ethical and social conditions.

WHY GLASS?

There are lots of reasons to use glass instead of other packaging materials in your daily life. Please note just three of them to remember why glass will be the right choice for your product:

- ① Glass does not contain any harmful chemicals
- ② Glass can be recycled over and over again
- ③ Using glass reduces waste and saves energy
