STOELZLE GLASS GROUP

YOUR PARTNER FOR SECURE GLASS PACKAGING SOLUTIONS

Stoelzle Pharma is part of the internationally active, family run Stoelzle Glass Group, which can rely on more than 200 years of expertise as a manufacturer of high-end glass containers. Its vast assortment includes premium glass products for the pharmaceutical, prestige spirits and food industry as well as for perfumery and cosmetic goods.

Stoelzle Pharma produces first-class pharmaceutical primary packaging made of type 2 and type 3 moulded glass in accordance with ISO 15378 GMP. We meet the highest hygiene and quality standards to ensure safe products for our customers and their patients.

OUR VISION

Our aim is to be the first choice partner for both our customers and our employees, through establishing a culture of reciprocal trust and by striving for first class performance, flexibility and reliability. This will earn and enable us to sustain a leading role in the markets.

OUR VALUES

We believe in utmost product quality, brilliant design and high usability in all our business fields. We work closely with our customers, suppliers and partners. It is our top priority to be transparent, respectful, open minded, and flexible in order to create stunning bottles for all our customers.

LOCATIONS

STOELZLE AROUND THE WORLD

The Stoelzle network comprises seven manufacturing plants, three decoration sites and several sales offices worldwide.

We are one of the leading manufacturers of pharmaceutical glass packaging and supplier to the global pharmaceutical and healthcare industries. Our two production facilities in Austria and Czech Republic with mutual back-up function focus specifically on these industries.

STOELZLE FACTS

- + Headquarter: Köflach/Austria
- + Production: 7 sites
- + Decoration: 4 sites
- + Employees: 3.095 worldwide

PHARMA PRODUCTION SITES

- + Stoelzle Oberglas GmbH (Köflach, AT)
- + Stoelzle Union s.r.o (Heřmanova Huť, CZ)

” WE ARE PASSIONATE ABOUT GLASS.

PROTECTING PEOPLE & ENVIRONMENT

OUR SUSTAINABLE WAY

Our products are produced with sustainability and maximum safety in mind. We take our responsibility seriously. Our approach protects what matters: people and the environment.

We evaluate and optimize environmental impact as well as energy consumption in all aspects, respect the legal regulations in the field of energy consumption and make a significant contribution to the environment because of continuous improvements and innovations.

Due to the strong environmental awareness and high quality standards in manufacturing glass packaging, we obtained numerous certificates.

CERTIFICATIONS

- + ISO 14001
(Environmental Management System)
- + ISO 50001
(Energy Management System)

Awarded gold for  excellent CSR engagement.

GLASS IS 100 % ...

Inert: Glass is impermeable and highly inert – it will not form any compounds with its contents.

Recyclable: Glass can be recycled infinite times without losing quality. This saves energy, raw materials and reduces emissions.

Tasteless: Consumers usually prefer glass packaging as it does not distort the flavor of content it contains.

Natural: Glass is entirely produced by natural materials. Therefore glass packaging secures customers health.

QUALITY MANAGEMENT

IN SAFE HANDS WITH STOELZLE

Our bottles are part of the final medicinal product – that’s why quality and product safety are the most important prerequisites for Stoelzle.

Both the production and quality controls of our production facilities are subject to strict guidelines. Therefore we have globally standardized and established an Integrated Quality Management System across our sites. This enables us to fulfill and surpass our customers’ quality expectations.

CERTIFICATIONS

- + ISO 9001
- + ISO 15378 (GMP)
- + Active Drugmaster File at FDA and Canada
- + BRC IOP Food packaging Standard

KNOWLEDGE IS STRENGTH

CONTINUOUS IMPROVEMENT

We are not satisfied with the status quo, so we are pushing both basic and applied research to gain new knowledge in the field of glass manufacturing.

The Stoelzle Research & Development team has set its focus on continuous improvement, the quality of our glass and the production processes, as well as reducing the energy consumption and CO₂ footprint in all our manufacturing sites.

STOELZLE RESEARCH & DEVELOPMENT

- + Increased use of cullet to save energy and lower emissions
- + Increased use of secondary materials
- + Participation in international research projects on glass development
- + State-of-the-art glass laboratory
- + Constant improvement of processes and implementation of new technologies

TYPE 2 GLASS VIALS

ECOSECUR

A new, innovative process enables reliable and precise dosing tailored to the size of the glass. In this liquid treatment, fewer chemicals are used and there are no toxic substances. At the same time, we can guarantee the highest product quality and increased work safety through lower contamination during the production process as well as safe storage and handling of raw materials. With EcoSecur injection and infusion vials Stoelzle Pharma has reinvented type 2 glass for parenteral and non-parenteral applications.

Process stability offers our highest product quality for smaller (starting with 6 ml) and bigger vials through automated, consistent and precise treatment solution dosing.

Superior glass quality increases product safety through automated process controls and 100 % treatment detection.

Minimised environmental impact is achieved through precise and optimal dosage of ammonium sulfate – as much as necessary, as little as possible.

Improved hydrolytic resistance suitable for most acidic and neutral aqueous preparations.

EVERYTHING YOU NEED IN ONE PLACE

ONE STOP SHOP

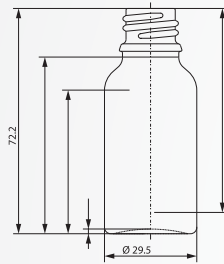

Our customers are at the heart of our decision-making. It is our business to provide comprehensive solutions with extra services and value-added offerings. We develop products together with you, take care of the individual decoration, find the appropriate closure and, if needed, offer customer-specific packaging. Take advantage of our offer and benefit from our experience.

YOUR IDEAS BECOME REALITY

DESIGN & PRODUCT DEVELOPMENT

Give your product the special edge it needs and give yourself a strategic advantage. With a unique design, you can create an outstanding product with a clear identity. Develop distinctive products with the help of our experienced team and benefit from the advantages of our skills.

#1 – IDEA

Can't you find the right item in our product range? No problem – tell us about your requirements and ideas. With our know-how we convert your idea into an individual product.

#2 – DRAWING

The best starting point for a new development is a technical drawing. These are made based on your specification and taking into account all technical details.

#3 – 3D MODEL

State-of-the-art 3D printers make it possible to visualize your ideas. Upon request we can create 3D prototypes of your very own design!

MAKE YOUR PRODUCT UNIQUE DECORATION

Elevating your product with our in-house decoration to the forefront of the market is our specialty, and we offer a wide range of decoration techniques to achieve this. With over 20 different decoration methods available, we stop at nothing to deliver your perfect piece.

SPRAYING

Utilising cutting-edge spray technology, we can apply any colour with finishes ranging from glossy to satin or opaque to transparent. Your products can also receive unique special effects through our spraying process.

PRINTING

For intricate design styles, we offer single or multi-coloured screen printing to ensure precise application of your decorations. We go the extra mile by using various colour systems, including organic inks, UV inks, enamel, or sustainable recycled ink sourced from rubber waste.

FROSTING

If you prefer a matte surface, frosting might be the ideal choice for you. Classic frosted glass looks stunning as is, but for that extra touch of elegance, we can incorporate screen printing or hot stamping to give your frosted glass a distinctive flair.

CAPS & CLOSURES

Stoelzle Pharma is a supplier of complete packaging systems, including appropriate caps, closures and inserts for pharmaceutical products and goods for well-being such as nutraceuticals, cosmeceutical or CBD.

WE OFFER

- + Comprehensive advice
- + Bottles & closures from one source
- + Carefully selected closure manufacturers as partners
- + Traceable and documented production chain

HIGH-QUALITY PHARMACEUTICAL GLASS PACKAGING
FIELDS OF APPLICATION

RX BOTTLES

Our RX portfolio represents a wide range of high quality type 2 and type 3 moulded glass bottles for prescription drugs for human and veterinary medicine.

OTC BOTTLES

Our OTC range offers a large selection of pharmaceutical glass containers in a variety of shapes and sizes for housing over the counter medicines.

WELL-BEING PRODUCTS

Our Well-being range offers sustainable glass packaging ideal for holding natural products for a balanced lifestyle.

DROPPER BOTTLES

Our dropper bottles, made of type 3 glass, are available from 2.5 ml to 100 ml in amber and flint glass. Dropper bottle packaging is used for prescription drugs, OTC medicines and for well-being products such as CBD oils, essential oils, homeopathy, aromatherapy, dietary supplements and cosmetics.

MIX AND MATCH

DISCOVER OUR CLOSURES

We are your ultimate destination for a diverse selection of caps and closures for flat-shoulder bottles and jars. We ensure that the desired closure harmonises with the packaging, forms a perfect unit and protects the product as best as possible. We are able to offer vegan and low carbon closures to support your sustainability goals.

CLOSURES FOR JARS

When it comes to our new range of amber jars, our offerings encompass a wide range of closures made from materials such as PP matte smooth, vegan materials, wood, Standard PP/PE, aluminium or acrylic, as well as child-resistant closures (CRC), among others.

CLOSURES FOR FLAT-SHOULDER BOTTLES

We are your ultimate destination for a diverse selection of closures. For flat-shoulder bottles, we offer an extensive range of caps and pumps, including snap caps, flip tops, cream pumps, spray pumps, pipettes and more.
