Expert Opinion

Certificate according to food law

Dieses Gutachten ersetzt jenes von 2020-11-04

Certificate No.: 2001767eK

Date: 2020-11-09

Client: STOELZLE Wymiarki Sp z o.o.
ul. Ks.Witolda 11
68-131 Wymiarki
Poland

Product: Bottle from molded glass; white-flint

Recipe according to message from 2020-08-31

Description: Glass bottles

Order: Order of 9/21/2020

Legal declarations may only be reproduced in full, but not in part, without written permission of OFI. The declaration was done within the framework of OFI's authorization according to § 73 / LMSVG and is subject to a quality assurance program according to EN ISO/IEC 17025:2017.

1 DECLARATION

The composition of the product complies with Art. 3 (1) of the Regulation (EC) No. 1935/2004 relating to materials and articles intended to come into contact with food.

The mentioned products in the announced composition and on condition of appropriate processing are permissible food contact materials according to § 16 (1) of the Austrian Law for Food Safety and Consumer Protection (LMSVG).

The results of heavy metal migration testing in OFI test report no. 2001767/12035e comply with the limits that apply to lead, cadmium, zinc, antimony and barium as laid down in Directive 84/500/EEC and the Austrian Regulation No. 893 on ceramic articles. In addition, the results comply with the limits that apply to the tested elements as laid down in the Council of Europe Resolution CM / Res (2013) 9 for articles made of metal and metal alloys.

2 CONDITIONS

Regarding LMSVG there are no objections against the use of the products in direct contact with food, if they are manufactured in continuous and perfect quality and properly processed according to their application, so that there is no unfavorable influence to the intended food – neither directly nor indirectly; has the latter particularly applied also to the organoleptic characteristics of food.

The finished products have to meet restrictions and specifications as well as migration limits mentioned by the relevant regulations (e.g Directive 84/500/EEC, Austrian Regulation No. 893 on ceramic articles, etc.).

In the case of the products, it must be ensured that there is no contamination of any coating agents on the inside of the finished glass containers.

The assessment is based on the condition that the composition of the products was announced completely and no other substances are present.

If declarations of compliance were submitted, we assumed that they are complete with respect to the composition of the products and especially meet all the requirements of Commission Regulation (EU) No. 10/2011 (Annex IV).

All statements refer exclusively to the above mentioned products with the declared composition. Any change in the recipe shall be communicated to OFI immediately.

As defined by Art. 17 of Regulation (EC) No. 178/2002 operators shall insure by proper inspections that requirements of food law are met and - if required - that necessary measures for correction of deficiencies and minimizing risk are taken.

In addition operators at all stages of production, processing and distribution within the businesses under their control shall ensure traceability of products as defined by Art. 17 of Regulation (EC) No. 1935/2004.

The present certificate is issued by OFI Technologie & Innovation GmbH within the framework of an authorization by the Federal Ministry for Health according to § 73 LMSVG.

Following § 17 (2) LMSVG this certificate shall be valid for 5 years. In case of change of processing procedure, law or new toxicological data, this certificate loses its validity. In case of change of general conditions concerning product quality (e.g. composition, processing), statutory requirements and/or new risk assessments by the European food Safety Authority (EFSA), this certificate will cease to be valid.

This Certificate No. **2001767eK** comprises
4 sheets with 0 table(s), 0 figure(s) and 0 appendix(es).

Any test results relate only to the samples tested. Expert opinions may be made available to third parties, either free of charge or against payment, if the full wording of the Expert opinion is given and if OFI is expressly named as the author. All tests applied are subject to a quality assurance program according to EN ISO/IEC 17025:2017. Expert opinions are not drawn up in the context of the accreditation of OFI as a testing and inspection body.

The General Terms and Conditions of OFI Technologie & Innovation GmbH shall apply as amended. They are available for download on our website (www.ofi.at).
